Election Requirement

The finality of the Office Action dated 6/18/02 is withdrawn in light of amendment filed 10/31/02. This amendment requires that the instant invention comprise lipophilic solvents, lipophobic plant nutrients, and cationic emulsifiers. In light of the amendment filed, an election of composition is required. See election requirement below.

This application contains claims directed to the following patentably distinct species of the claimed invention: Numerous compositions comprising lipophilic solvent(s), lipophobic plant nutrient(s) plus cationic emulsifier(s).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. **Currently, a composition comprising 5-75% lipophilic solvent(s), lipophobic plant nutrient(s) present up to 50% plus cationic emulsifier(s) is generic.**

Applicant is advised that a reply to this requirement must include an identification of the species that is elected (**elect an invention comprising specific lipophilic solvent(s) , specific lipophobic plant nutrient(s) and specific cationic emulsifier(s))** consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit:

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CAR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).
